PROFILE

Full Stack Software Developer with 2 years of experience shipping internal tools and client-facing web platforms end-to-end — from frontend architecture through backend integration and production deployment. Experienced in AI-assisted development workflows and cross-functional delivery in fast-moving environments.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, HTML, CSS
Frontend	React, Vite, Redux, Tailwind CSS, Next.js, Material UI, ShadCN/UI
Backend & Database	Node.js, Express, FastAPI, PostgreSQL, SSMS, MongoDB, Supabase
Dev Tools	Git, Docker, Cypress, Postman, GitLab, Azure DevOps, Grafana, Swagger
Cloud	AWS, Netlify, Render, Supabase
Design & AI	Figma, Adobe Illustrator, Prompt Engineering, Multi-agent Workflows, Cursor, Antigravity, Claude, ChatGPT, Gemini, Ollama

WORK EXPERIENCE

Full Stack Software Developer • Enablex Pte. Ltd. (formerly Graphene Services Pte. Ltd) • Full-Time Jul 2025 – Present

- Owned two full-stack platforms end-to-end — a structured creative asset review tool and an AI-powered ideation platform featuring image generation, GIFs, and storyboarding — covering architecture, implementation, deployment, and client demos across multiple revamps under compressed timelines.
 - Established an AI-assisted delivery workflow using Cursor, Claude Code, and Antigravity for planning, code generation, and validation — enabling consistent full-stack delivery under high workload and rapidly shifting requirements.
 - Integrated third-party image generation APIs in collaboration with an in-house ML team; coordinated cross-functional delivery across design, backend, and AI components with minimal oversight.
 - Collaborated with a fellow developer on larger projects, dividing work across user stories and coordinating delivery to meet project milestones.
- Stack: React, TypeScript, Vite, Next.js, Tailwind CSS, MUI, Redux, FastAPI, Python, SSMS, PostgreSQL, Docker, GitLab, Azure DevOps

Frontend Software Developer • Tomie Technologies Pte. Ltd. • Full-Time Sep 2024 – Jun 2025

- Founding frontend developer on a modular ERP system, architecting the frontend from scratch — scalable layouts, shared component library, design system, and navigation flows across 4 modules including HR and Finance.
 - Led UI/UX pre-development — produced Figma prototypes that aligned stakeholders and eliminated rework before a line of code was written.
 - Built and integrated RESTful APIs for Claims Management and multi-level Approval Workflows, automating core business processes.
- Stack: React, TypeScript, Tailwind CSS, Redux, Vite, Node.js, Express, PostgreSQL, Figma, AWS, Cloudflare

Full Stack Web Developer • Freelance • Part Time Dec 2023 – Feb 2024

- Built and shipped a full-stack medical logistics web app, replacing manual coordination with role-based dashboards for admins and drivers.
- Stack: React, Tailwind CSS, Node.js, Express, MongoDB, Netlify, Render

Design & Technology Technician • Dulwich College Singapore • Full-Time Aug 2019 – Jun 2024

- Supported 200+ students across design and technology programmes; automated finance and procurement paperwork with Python scripts and Axiom.ai, saving 70–80% of preparation time across tasks previously taking 1–2 hours each, performed at least 3 times weekly.
- Stack: Python, Axiom.ai

EDUCATION

Bachelor of Computer Science, Major in Digital Systems & Security • Part-Time 2021 – 2024
University of Wollongong / Singapore Institute of Management

Diploma in Product Design & Innovation • Full-Time 2014 – 2017
Ngee Ann Polytechnic
